2 TURF WEED CONTROL

Turf weeds are showing signs of die back from recent herbicide application. Weeds can now be spot treated. *Photo below.* **completed 12.12.23.**

Broadleaf weeds have been treated with herbicide and weeds are dying off. Remaining weeds can be spot treated. Properly timed applications of pre-emergent herbicide will help to reduce grassy weed germination. **completed 12.12.23**.

Bahiagrass and Bermudagrass are beginning to go into dormancy.

The turf was mowed high as per the specifications. The cut was clean from sharp blades. There was a slight loss of color over the past month. This is common in the cooler months. The Bahiagrass and the common Bermudagrass lost some color and density as it goes into its dormant period. New sod is improving the density in the thinner St. Augustine turf. There was evidence of herbicide dieback of broadleaf weeds. The remaining weeds can be spot treated. Preemergent herbicide for grassy weed control needs to be applied when temperature is appropriate. The general rule of thumb is to apply pre-emergent herbicides in mid-February for Central Florida. Apply the pre-emergent herbicide before temperatures consistently rise above 65 to 70°F to avoid harming the turf. There were no turf insects noted, but patch disease needs to be controlled in a few areas.

completed 1.4.24.
3 SHRUB PRUNING

*It should be noted that the shrubs, including but not limited to, the hawthorns and schilling hollies, should not be pruned too tightly. This means that too much vegetative growth was being removed, limiting the plants availability to make food for itself. In addition, the plant will look more attractive by not having "holes" in it and allowing it to develop its more natural shape. (i.e. Indian Hawthorn has a natural mounded habit)

General work order-all hedge trimming and weeding needs be done at the same time, in accordance with specifications. The contractual pruning schedule was not adhered to, allowing many shrubs to grow beyond an acceptable state. completed 1.2.24.

Be certain that all individual shrubs and hedges are pruned in such a manner so that the bottom section is wider than the top to receive sufficient sunlight. This will prevent the shrubs from being shaded out at the bottom. completed 1.2.24.

SUMMARY

Redtree performed to contractual standards for this inspection. The turf was mowed at the proper height with sharp blades. The trimming, edging and cleanup were neatly performed. There was a slight loss of color over the past month, but it was still good for the season. The density was strong except for the Bahiagrass and Bermudagrass which are entering a winter dormancy period. New sod is further improving the density. The broadleaf weed growth is being controlled. There were no signs of turf insect activity, but patch disease has shown up in a few turf panels. Most of the shrubs were healthy, but there continue to be issues related to the health of select anise and pineapple quava plants. The shrubs appear to be pruned according to the schedule, but some palmettos and trees need immediate attention. The bed weeds are under control. There were no irrigation breaks noted, but several areas were dry or receiving inconsistent irrigation. The seasonal flower display was providing excellent curb appeal. RedTree Landscape Systems certifies that all work on this list has been completed in the 14-day timeframe specified in the contractual agreement and provided to PSA within the same period.

- Payments Received: The Warranty for the contract is only valid if payment is received in full on acceptance of the work
- Diligence: The Contractor agrees to carry out its Work diligently and to provide sufficient supervision and inspection of its staff and subcontractors and that it's work will be of proper and professional quality, and in full conformity with the requirements of the contract
- Competence: The Contractor warrants that it is competent to perform the Work and that it has the necessary qualifications including knowledge and skill with the ability to use them effectively.
- Site Unknowns: It is the responsibility of the Client or the Client's Representative to fully inform
 the Contractor of all the information regarding site unknowns that may include difficult buried
 materials, cables, and pipes, tree stumps, drainage or water table issues, rock, and shale sub
 surfaces and/or other impediments, issues or factors that could otherwise impact the quality, cost
 and timeliness of project completion. Failure to notify the Contractor may lead to additional costs
 to the Client (at the Contractor's discretion) and schedule time not included in the proposal and
 may require changes in design and construction to overcome such problems all for which the

Client will be responsible. Client can avoid such risks by permitting the Contractor to do appropriate soil and ground tests, review the site,

and to secure additional required site information from appropriate government and other authorities.

- Damaged Utilities: Should damage occur to utilities during construction, the Contractor is only liable for the cost of the repair. the Contractor is not liable in any way for inconvenience to the Client caused by damage to the utilities
- Damage to neighbors buried utilities, on the Client's property, are the responsibility of the Client
- Damage to installed material (plants, trees, sod, etc.) by foot traffic, machinery, equipment, other trades, owner neglect or acts of nature will be excluded from any warranty and will not be replaced at the cost of Contractor
- Damage due to pest infestation is excluded from warranty and any damaged material will not be replaced at the cost of the Contractor. If, however, the Contractor has a separate maintenance contract with the client, pest control would fall under that contract and would be subject to those warranty parameters.
- Damage due to improper watering after final acceptance will not be replaced at the cost of the Contractor

- Wood: Pressure treated wood cannot be guaranteed against warp age, checking, or cupping.
- Stone: Natural stone has color variations that vary from stone to stone. In addition, mineral deposits such as lime, iron, etc. can change the stone and even bleed. This is the nature of the product, and the Client accepts this as a natural and acceptable quality of the stone
- Metal: Metal, which is not galvanized, is not guaranteed form rusting commencing immediately after installation
- Concrete: Spider cracks (hairline stress-fractures) are considered a normal characteristic of all types of concrete. Concrete may crack substantially over time due to proximity of tree roots.
- Warranty Time Period: The Contractor warrants all construction and installation for a period of one (1) year, providing that they have been maintained properly. All construction materials are subject to manufacturer's specific warranties/guarantees. Planting is warranted for one (1) year if there is an approved irrigation system
- Client Responsibilities: The Client recognizes and agrees that they have a responsibility to
 maintain constructions, plants, bushes, trees, and other installations in keeping with standard
 quality maintenance requirements for the Warranty to remain in effect. Failure to properly
 maintain materials or horticulture installations will void the warranty. Client further recognizes and
 agrees that damage to construction, materials, horticulture elements and other warrantable items
 of the project will not be warranted if the damage or loss is due to elements beyond the control of
 the Contractor. For example, flooding eaves, troughs that damage plants, fallen branches, animal
 caused damage, damaged/ burst irrigation or drainage pipes that were not maintained properly,
 use of improper chemicals, improper maintenance, extreme or unusual weather conditions, and
 similar and/or related situations void all warranties provided by the Contractor
- Use of Client Selected and Approved Substandard Materials: Client recognized and agrees that if
 the Client has chosen and approved the use of substandard materials for any application that the
 one-year warranty will be void or otherwise limited in writing on those items so impacted but will
 remain in effect for all other elements of the project not impacted directly or indirectly by use of
 substandard materials. the Contractor will notify in writing to the Client any material that
 the Client has selected that would negatively impact the one-year warranty of the Contractor –
 prior to purchasing and/or installing such materials

- Material Grades: The Client recognizes that all materials come in a range of grades of quality and finishes, and that natural materials are not perfect. Natural wood has knots, and other natural materials have variability in color due to a wide range of factors, and that sample while useful in material selection decision-making, cannot be expected to accurately represent the total completed installation. The Contractor shall endeavor to enable the Client to see or understand the representative range of color, texture, and related of all materials installed on a project, however, acceptable Florida Grades and Standards will be used for the final selection of those materials. Once the selection has been approved by the Client, the Client will be responsible for all costs associated with changing any given material should the Client change their mind during or after material is purchased or installed.
- Plant specified height and width are used as primary sizes for sourcing plant material. This may result in minor deviation from container and caliper size specifications.

- Change Order: The quantities or specifications of material as outlined in the Proposal could be adjusted at any time with approval in the form of a signed Change Order. Change Orders will be executed using current market prices

Escalation Clause

 In the event of significant delay or price increase of material, equipment, or energy occurring during the performance of the contract through no fault of the Construction Ma nager, the Contract Sum, time of completion or contract requirements shall be equitably adjusted by Change Order in accordance with the procedures of the Contract Documents. A change in price of an item of material, equipment, or energy will be considered significant when the price of an item increases <u>5</u>% percent between the date of this Contract and the date of installation

Warranty and Tolerances

- Payments Received: The Warranty for the contract is only valid if payment is received in full on acceptance of the work
- Diligence: The Contractor agrees to carry out its Work diligently and to provide sufficient supervision and inspection of its staff and subcontractors and that it's work will be of proper and professional quality, and in full conformity with the requirements of the contract
- Competence: The Contractor warrants that it is competent to perform the Work and that it has the necessary qualifications including knowledge and skill with the ability to use them effectively.
- Site Unknowns: It is the responsibility of the Client or the Client's Representative to fully inform the Contractor of all the information regarding site unknowns that may include difficult buried materials, cables, and pipes, tree stumps, drainage or water table issues, rock, and shale sub surfaces and/or other impediments, issues or factors that could otherwise impact the quality, cost and timeliness of project completion. Failure to notify the Contractor may lead to additional costs to the Client (at the Contractor's discretion) and schedule time not included in the proposal and may require changes in design and construction to overcome such problems all for which the

Client will be responsible. Client can avoid such risks by permitting

the Contractor to do appropriate soil and ground tests, review the site, and to secure additional required site information from appropriate government and other authorities.

- Damaged Utilities: Should damage occur to utilities during construction, the Contractor is only liable for the cost of the repair. the Contractor is not liable in any way for inconvenience to the Client caused by damage to the utilities
- Damage to neighbors buried utilities, on the Client's property, are the responsibility of the Client
- Damage to installed material (plants, trees, sod, etc.) by foot traffic, machinery, equipment, other trades, owner neglect or acts of nature will be excluded from any warranty and will not be replaced at the cost of Contractor
- Damage due to pest infestation is excluded from warranty and any damaged material will not be replaced at the cost of the Contractor. If, however, the Contractor has a separate maintenance contract with the client, pest control would fall under that contract and would be subject to those warranty parameters.
- Damage due to improper watering after final acceptance will not be replaced at the cost of the Contractor

- Wood: Pressure treated wood cannot be guaranteed against warp age, checking, or cupping.
- Stone: Natural stone has color variations that vary from stone to stone. In addition, mineral deposits such as lime, iron, etc. can change the stone and even bleed. This is the nature of the product, and the Client accepts this as a natural and acceptable quality of the stone
- Metal: Metal, which is not galvanized, is not guaranteed form rusting commencing immediately after installation
- Concrete: Spider cracks (hairline stress-fractures) are considered a normal characteristic of all types of concrete. Concrete may crack substantially over time due to proximity of tree roots.
- Warranty Time Period: The Contractor warrants all construction and installation for a period of one (1) year, providing that they have been maintained properly. All construction materials are subject to manufacturer's specific warranties/guarantees. Planting is warranted for one (1) year if there is an approved irrigation system
- Client Responsibilities: The Client recognizes and agrees that they have a responsibility to
 maintain constructions, plants, bushes, trees, and other installations in keeping with standard
 quality maintenance requirements for the Warranty to remain in effect. Failure to properly
 maintain materials or horticulture installations will void the warranty. Client further recognizes and
 agrees that damage to construction, materials, horticulture elements and other warrantable items
 of the project will not be warranted if the damage or loss is due to elements beyond the control of
 the Contractor. For example, flooding eaves, troughs that damage plants, fallen branches, animal
 caused damage, damaged/ burst irrigation or drainage pipes that were not maintained properly,
 use of improper chemicals, improper maintenance, extreme or unusual weather conditions, and
 similar and/or related situations void all warranties provided by the Contractor
- Use of Client Selected and Approved Substandard Materials: Client recognized and agrees that if
 the Client has chosen and approved the use of substandard materials for any application that the
 one-year warranty will be void or otherwise limited in writing on those items so impacted but will
 remain in effect for all other elements of the project not impacted directly or indirectly by use of
 substandard materials. the Contractor will notify in writing to the Client any material that
 the Client has selected that would negatively impact the one-year warranty of the Contractor –

prior to purchasing and/or installing such materials

- Material Grades: The Client recognizes that all materials come in a range of grades of quality and finishes, and that natural materials are not perfect. Natural wood has knots, and other natural materials have variability in color due to a wide range of factors, and that sample while useful in material selection decision-making, cannot be expected to accurately represent the total completed installation. The Contractor shall endeavor to enable the Client to see or understand the representative range of color, texture, and related of all materials installed on a project, however, acceptable Florida Grades and Standards will be used for the final selection of those materials. Once the selection has been approved by the Client, the Client will be responsible for all costs associated with changing any given material should the Client change their mind during or after material is purchased or installed.
- Plant specified height and width are used as primary sizes for sourcing plant material. This may result in minor deviation from container and caliper size specifications.

Preserve at Wilderness Lake CDD ENGINEER'S REPORT FOR February 7th, 2024 BOARD MEETING

Ongoing Projects Report and Updates:

Paver Replacement Project

All administrative documentation requested from the Pasco County inspection department regarding closeout of the permit. The county has responded with a punchlist of items specifically related to the geotechnical testing documentation submittal from Testlab, the geotechnical firm that did the testing during the project. BDi is currently coordinating a resubmittal with Testlab and the county so that a final submission to close the permit can be made.

Dock Inspections

Rueben Clarson Consulting, the structural firm engaged by the district to perform a dock inspection of the lodge boardwalk, performed their site visit on January 4th, 2024 to assess the boardwalk as directed. The report has not been received as of this report but will be sent to the District manager when obtained.

Pine Knot Lane Swale Issue

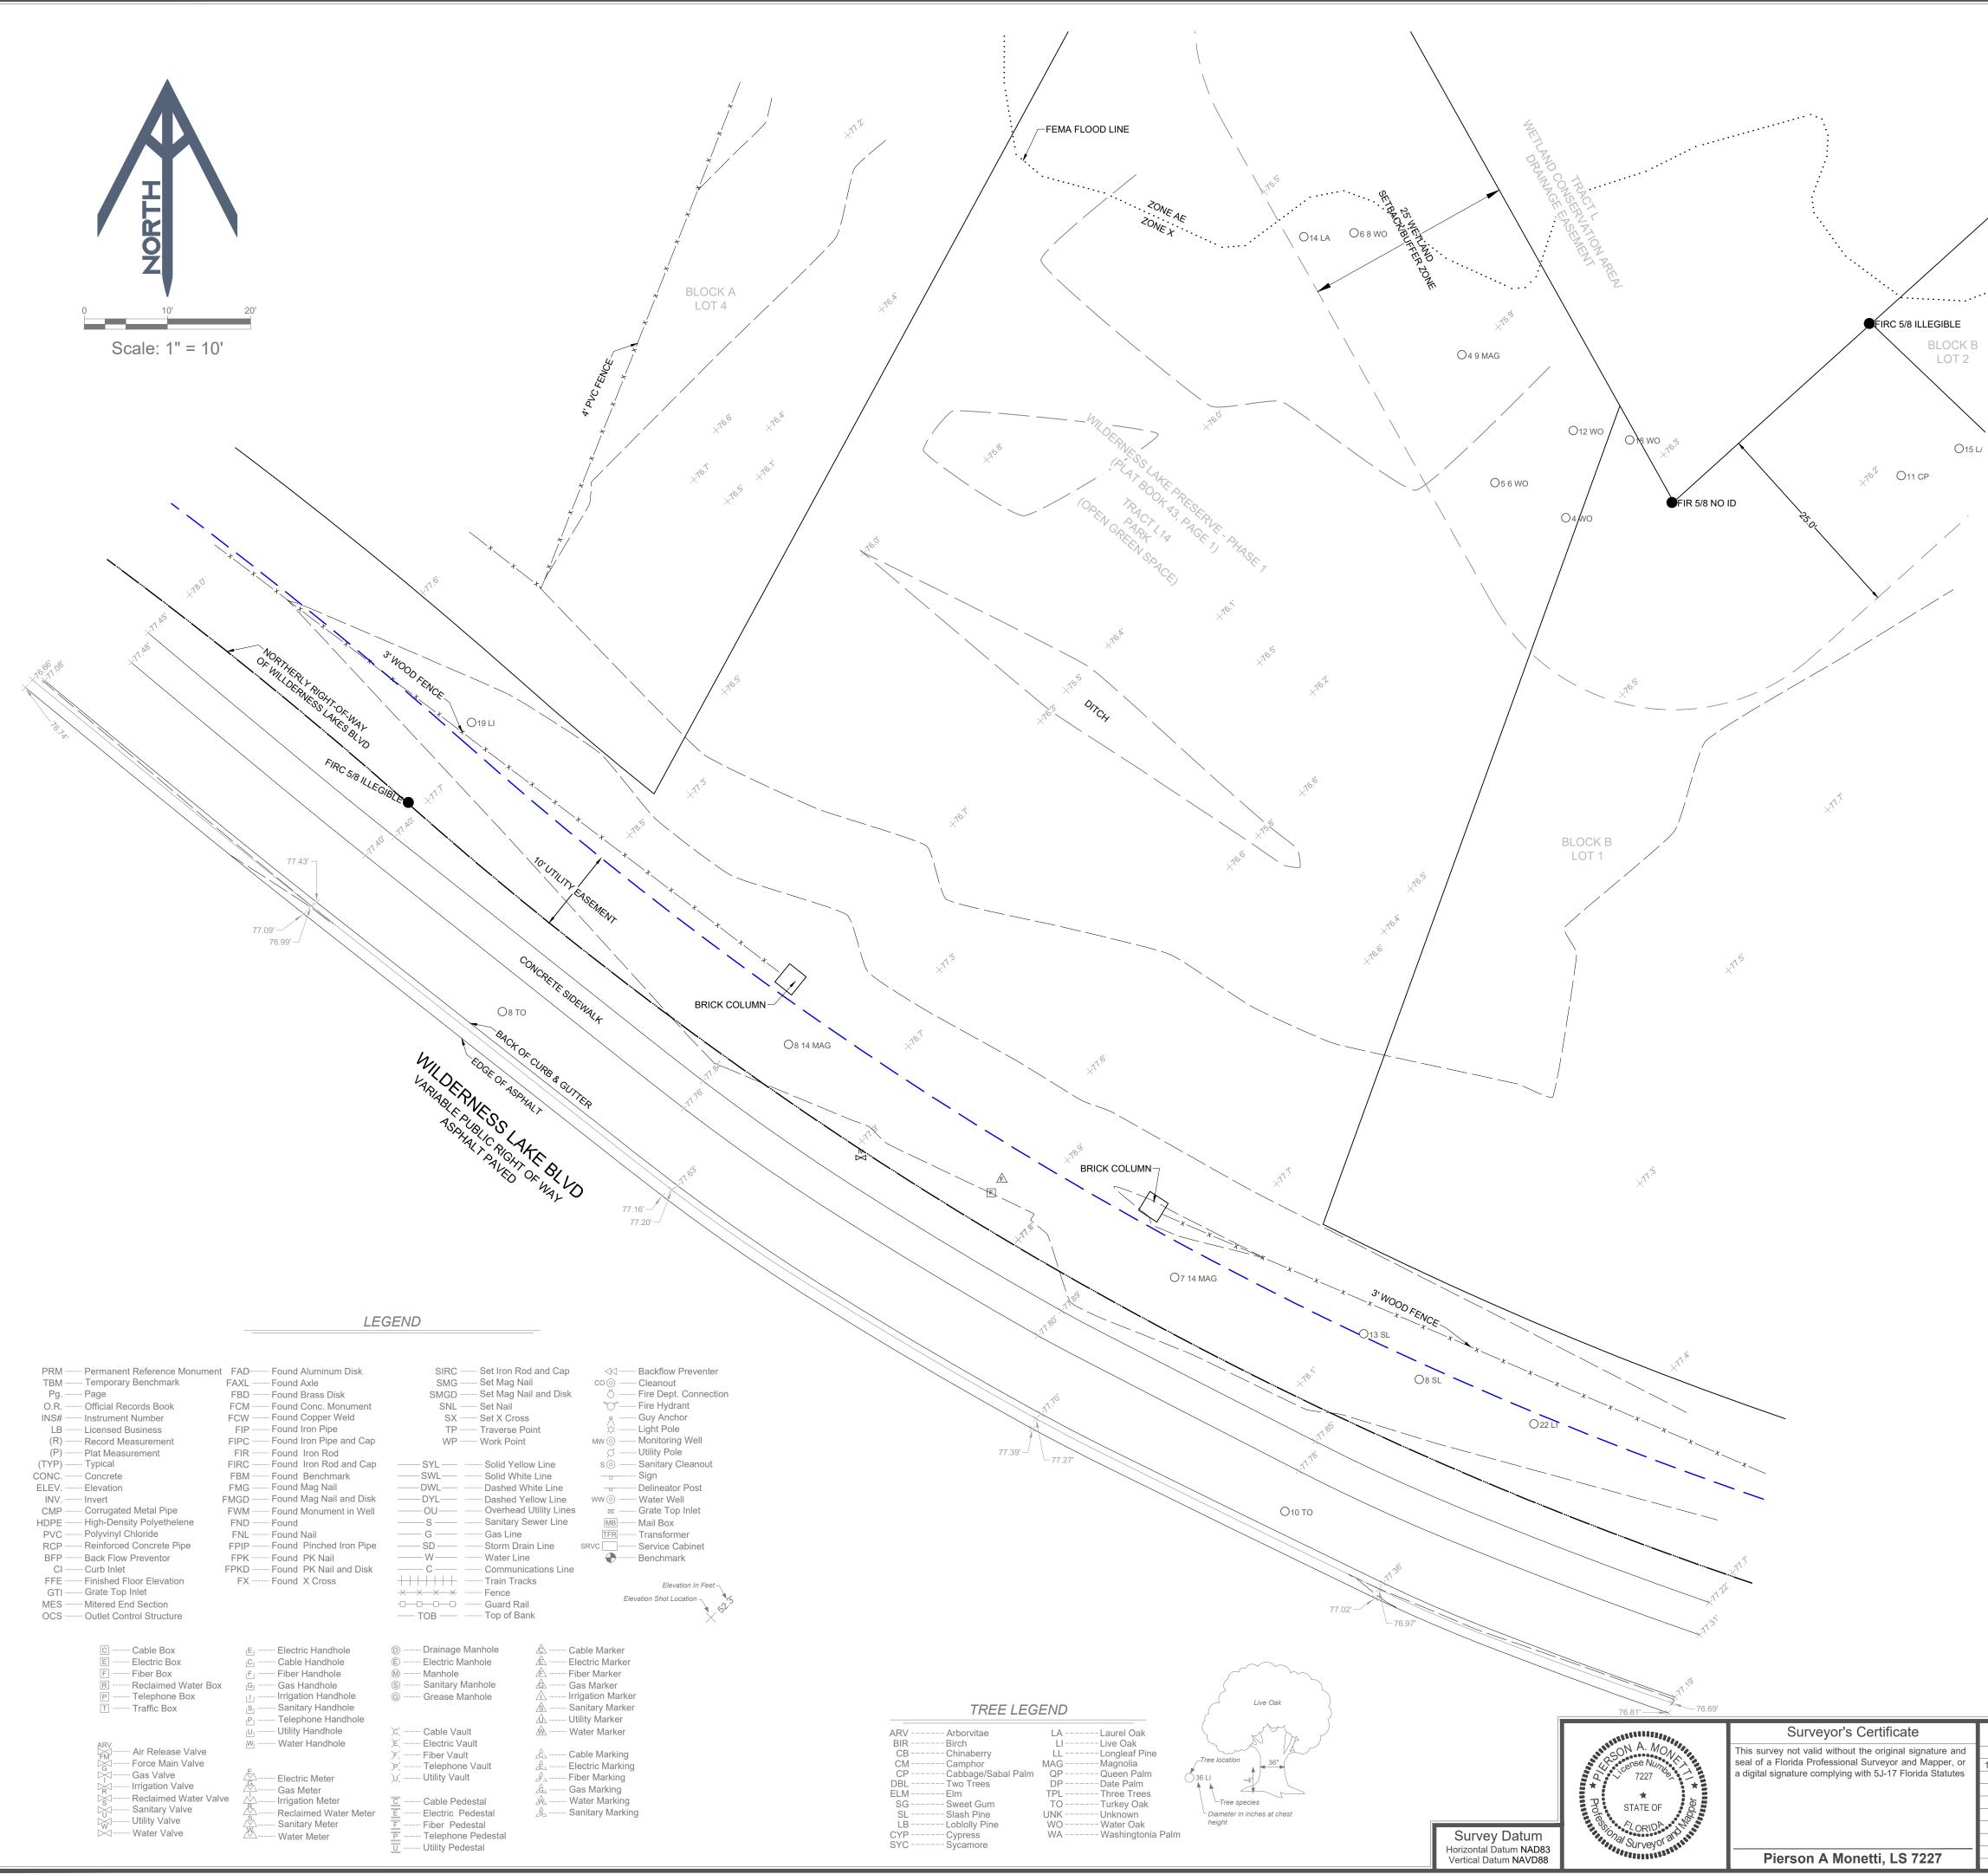

The survey work is complete and issued to the CDD (attached to this report). A site plan is also attached with this report detailing a potential option to fill the existing swale which was complained about by the adjacent homeowner and reroute the runoff to the adjacent wetland area as intended per the original permitted design. Note, that substantial dirt work and sod would be required for the project and the level of service to the potential resolution will be low due to the lack of grade available to convey runoff efficiently and the site restrictions of grading in the wetland. The estimate of construction cost based on the site plan is between \$8,000 to \$12,000. If desired, BDi can reach out to contractors for a hard cost for the board to consider if requested.

SWFMWD Statement of Inspection

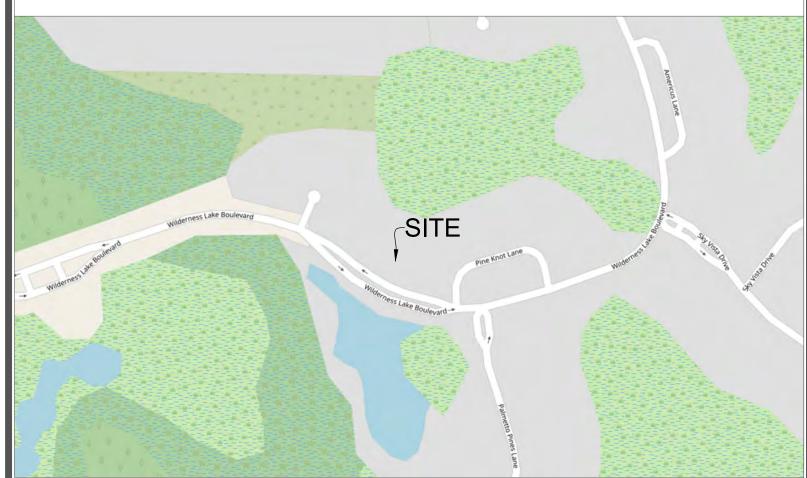

BDi performed the site visit for the two SWFWMD ERP inspections that are due. Reports and a deficiency list have been generated and shared with the District Manager and aquatics team. Most of the punch list has been completed, however, there are items that the GHS is not able to complete under their ongoing scope or are not capable of performing related to grading or pond sediment removal

which will require an outside contractor. BDi has reached out to contractors to obtain a bid for the items not performed by GHS. Proposals received will be sent to the District Manager as soon as received for board consideration. BDi has also coordinated with SWFWMD to resolve any administrative issues/letters recently received. All administrative issues will be resolved when recertification is submitted.

Failure to notify the Contractor may lead to additional costs to the Client (at the Contractor's discretion) and schedule time not included in the proposal and may require changes in design and construction to overcome such problems – all for which the

Client will be responsible. Client can avoid such risks by permitting the Contractor to do appropriate soil and ground tests, review the site,

If, however, the Contractor has a separate maintenance contract with the client, pest control would fall under that contract and would be subject to those warranty parameters.
- Damage due to improper watering after final acceptance will not be replaced at the cost of the Contractor

- Wood: Pressure treated wood cannot be guaranteed against warp age, checking, or cupping.
- Stone: Natural stone has color variations that vary from stone to stone. In addition, mineral deposits such as lime, iron, etc. can change the stone and even bleed. This is the nature of the product, and the Client accepts this as a natural and acceptable quality of the stone
- Metal: Metal, which is not galvanized, is not guaranteed form rusting commencing immediately after installation
- Concrete: Spider cracks (hairline stress-fractures) are considered a normal characteristic of all types of concrete. Concrete may crack substantially over time due to proximity of tree roots.
- Warranty Time Period: The Contractor warrants all construction and installation for a period of one (1) year, providing that they have been maintained properly. All construction materials are subject to manufacturer's specific warranties/guarantees. Planting is warranted for one (1) year if there is an approved irrigation system
- Client Responsibilities: The Client recognizes and agrees that they have a responsibility to
 maintain constructions, plants, bushes, trees, and other installations in keeping with standard
 quality maintenance requirements for the Warranty to remain in effect. Failure to properly
 maintain materials or horticulture installations will void the warranty. Client further recognizes and
 agrees that damage to construction, materials, horticulture elements and other warrantable items
 of the project will not be warranted if the damage or loss is due to elements beyond the control of
 the Contractor. For example, flooding eaves, troughs that damage plants, fallen branches, animal
 caused damage, damaged/ burst irrigation or drainage pipes that were not maintained properly,
 use of improper chemicals, improper maintenance, extreme or unusual weather conditions, and
 similar and/or related situations void all warranties provided by the Contractor
- Use of Client Selected and Approved Substandard Materials: Client recognized and agrees that if
 the Client has chosen and approved the use of substandard materials for any application that the
 one-year warranty will be void or otherwise limited in writing on those items so impacted but will
 remain in effect for all other elements of the project not impacted directly or indirectly by use of
 substandard materials. the Contractor will notify in writing to the Client any material that
 the Client has selected that would negatively impact the one-year warranty of the Contractor –
 prior to purchasing and/or installing such materials

- Material Grades: The Client recognizes that all materials come in a range of grades of quality and finishes, and that natural materials are not perfect. Natural wood has knots, and other natural materials have variability in color due to a wide range of factors, and that sample while useful in material selection decision-making, cannot be expected to accurately represent the total completed installation. The Contractor shall endeavor to enable the Client to see or understand the representative range of color, texture, and related of all materials installed on a project, however, acceptable Florida Grades and Standards will be used for the final selection of those materials. Once the selection has been approved by the Client, the Client will be responsible for all costs associated with changing any given material should the Client change their mind during or after material is purchased or installed.
- Plant specified height and width are used as primary sizes for sourcing plant material. This may result in minor deviation from container and caliper size specifications.

Preserve at Wilderness Lake Community Development District Rizzetta & Company, Inc. 3434 Colwell Ave, Suite 200 Tampa, FL 33614

The Objective and Scope of the Audit of the Financial Statements

You have requested that we audit the financial statements of Preserve at Wilderness Lake Community Development District, (the "District"), which comprise governmental activities and each major fund as of and for the years ended September 30, 2022, 2023, 2024, 2025, and 2026 which collectively comprise the basic financial statements. We are pleased to confirm our acceptance and our understanding of this audit engagement by means of this letter for the year ending September 30, 2022, with optional renewals for the years ending September 30, 2023, 2024, 2025, and 2023, 2024, 2025, and 2026.

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but Is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with auditing standards generally accepted in the United States of America (GAAS) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users made on the basis of these financial statements. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

The Responsibilities of the Auditor

We will conduct our audit in accordance with (GAAS). Those standards require that we comply with applicable ethical requirements. As part of an audit in accordance with GAAS, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.
- Obtain an understanding of internal control relevant to the audit in order to design audit
 procedures that are appropriate in the circumstances but not for the purpose of
 expressing an opinion on the effectiveness of the District's internal control. However, we
 will communicate to you in writing concerning any significant deficiencies or material
 weaknesses in internal control relevant to the audit of the financial statements that we
 have identified during the audit.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Conclude, based on the audit evidence obtained, whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the District's ability to continue as a going concern for the reasonable period of time.

Because of the inherent limitations of an audit, together with the inherent limitations of internal control, an unavoidable risk that some material misstatements may not be detected exists, even though the audit is properly planned and performed in accordance with GAAS.

We will maintain our independence in accordance with the standards of the American Institute of Certified public Accountants.

The Responsibilities of Management and Identification of the Applicable Financial Reporting Framework

Management is responsible for:

- Identifying and ensuring that the District complies with the laws and regulations applicable to its activities, and for informing us about all known violations of such laws or regulations, other than those that are clearly inconsequential;
- 2. The design and implementation of programs and controls to prevent and detect fraud, and for informing us about all known or suspected fraud affecting the District involving management, employees who have significant roles in internal control, and others where the fraud could have a material effect on the financial statements; and
- Informing us of its knowledge of any allegations of fraud or suspected fraud affecting the District received in communications from employees, former employees, analysts, regulators, short sellers, vendors, customers or others.

The Board is responsible for informing us of its views about the risks of fraud within the entity, and its knowledge of any fraud or suspected fraud affecting the entity.

Our audit will be conducted on the basis that management acknowledges and understands that it has responsibility:

- To evaluate subsequent events through the date the financial statements are issued or available to be issued, and to disclose the date through which subsequent events were evaluated in the financial statements. Management also agrees that it will not conclude on subsequent events earlier than the date of the management representation letter referred to below;
- 2. For the design, implementation and maintenance of internal control relevant to the preparations of fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; and
- 3. To provide us with:
 - a. Access to all information of which management is aware that is relevant to the preparation and fair presentation of the financial statements including information relevant to disclosures;
 - b. Draft financial statements, including information relevant to their preparation and fair presentation, when needed to allowed for the completion of the audit in accordance with the proposed timeline;

- c. Additional information that we may request from management for the purpose of the audit; and
- d. Unrestricted access to persons within the District from whom we determine it necessary to obtain audit evidence.

As part of our audit process, we will request from management written confirmation concerning representations made to us in connection with the audit, including among other items:

- 1. That management has fulfilled its responsibilities as set out in the terms of this arrangement letter; and
- 2. That it believes the effects of any uncorrected misstatements aggregated by us during the current engagement and pertaining to the latest period presented are immaterial, both individually and in the aggregate, to the financial statements taken as a whole.

Reporting

We will issue a written report upon completion of our audit of Preserve at Wilderness Lake Community Development District's financial statements. Our report will be addressed to the Board of Preserve at Wilderness Lake Community Development District. We cannot provide assurance that an unmodified opinion will be expressed. Circumstances may arise in which it is necessary for us to modify our opinion, add an emphasis-of-matter or other-matter paragraph(s), or withdraw from the engagement.
